

BBias decomposition: contributions sum to unconditional Δ Left: $N_e=20$, $\tau=.5$, $\text{origin}=.75$, $\text{copy}=.5$, $\text{cross}=.1$ | Right: $N_e=100$, $\tau=2$, $\text{origin}=.75$, $\text{copy}=.5$, $\text{cross}=.1$ 

Red = negative; blue = positive. Empty categories contribute zero and have no conditional estimate.
